

Senior Test Engineer

Position

Date: November 2017

Mobacar

Mobacar is an advanced Travel Technology and Artificial Intelligence company. Our approach to analytics at the core makes this a unique opportunity for a test engineer to work in an advanced technology environment.

Mobacar uses Artificial Intelligence to gain a deep cognitive understanding of customers, predict their specific mobility needs and fulfil this through our global ground transportation network in real time.

Each customer now gets the most relevant transportation option, at the most appropriate price delivered through a personalised booking experience across all customer touch points and devices.

This enables our partners to retail at a customer level driving increased bookings, revenue, customer retention and overall commercial performance.

How does the role fit with Mobacar?

We are seeking a Senior Test Engineer who can help shape the future of our product, serving consumers and major travel brands across the world.

Job Description

The position requires a Senior Test Engineer with excellent experience in multiple forms of testing.

We are looking for a test engineer to develop, maintain and execute exploratory and automated tests to ensure product quality.

The position is based in Killarney.

Responsibilities

- Estimating, prioritizing, planning and coordinating testing activities
- Creating detailed, comprehensive and well-structured test plans and test cases
- Design, develop and execute automation scripts using open source tools
- Identify, record and track bugs
- Perform thorough regression testing when bugs are resolved
- Develop and apply testing processes for new and existing products to meet client needs
- Liaise with internal teams (e.g. developers and product owners) to identify system requirements
- Track quality assurance metrics, like defect densities and open defect counts
- Stay up-to-date with new testing tools and test strategies

Requirements

- Proven work experience in software development (3+ Years)
- Proven work experience in software quality assurance
- Strong knowledge of software QA methodologies, tools and processes
- Experience in writing clear, concise and comprehensive test plans and test cases
- Hands-on experience with both white box and black box testing
- Hands-on experience with automated testing tools

- Solid knowledge of SQL and scripting
- Experience working in an Agile/Scrum development process
- Experience with performance and/or security testing is a plus
- BS/MS degree in Computer Science, Engineering or a related subject

Personal Qualities

Collaboration: strong focus on team working in an agile environment

Adaptive: ability to quickly learn new technologies

Innate passion for technology: Ongoing, up-to-date research into leading-edge developments that will help advance the overall solution delivery

Salary/Reward

This position attracts a very competitive salary, an attractive and open working environment, plus business performance salary reviews.
