## Job Description

Date: January 2019

---

## Mobacar

Mobacar is an advanced Artificial Intelligence and Travel Technology company. We are a successful high growth technology company with offices in Kerry and Dublin. Our approach to analytics at the core, makes this a unique opportunity to work in an advanced, AI driven environment where we focus on creativity and the successful growth and development of our team.

Mobacar has a unique approach which combines Data Science and Customer Experience techniques to increase short term conversions & revenue and the long-term customer performance of our partners. Our technology, our team and our products are gaining global acclaim for our innovation and approach. Every new team member is carefully selected to ensure not only that Mobacar will continue to disrupt the travel industry but that each new member has a clear path to grow and develop.

## Job Description

We are looking for a qualified Mobile developer to join our Engineering team. You will be working with our engineers to develop and maintain high quality mobile applications integrating to our underlying AI driven platform.

As a Mobile developer, you'll collaborate with internal teams to develop functional mobile applications and websites, while working in a fast-paced environment. Ultimately, you should be able to design and build the next generation of our mobile websites, apps and other mobile interfaces.

The responsibilities include:

- Support the entire application lifecycle (concept, design, test, release and support)
- Develop intuitive, usable, and engaging interactions and visual designs for mobile
- Produce fully functional mobile applications writing clean code
- Gather specific requirements and suggest solutions
- Write unit and UI tests to identify malfunctions
- Troubleshoot and debug to optimize performance
- Design interfaces to improve user experience
- Liaise with Product development team to plan new features
- Ensure our mobile applications meet quality standards
- Research and suggest new mobile products, applications and protocols
- Stay up-to-date with new technology trends

The position is based in Killarney, Co. Kerry.

## Skills and Experience

- Proven work experience as a Mobile developer
- Demonstrable portfolio of released applications on the App store or the Android market (submitted with application)

- In-depth knowledge of at least one programming language like Swift and Java
- Experience with third-party libraries and APIs
- Familiarity with OOP design principles
- Excellent analytical skills with a good problem-solving attitude
- Ability to perform in a team environment
- Experience working in Agile Scrum Methodology with development teams
- A self starter who is happy to take responsibility to implement Mobile requirements
  
- Desirable skills:
  - Deep understanding of Apple's human interface design guidelines, Android design and other mobile platform designs, including Google's material design.
  - Experience in development of Mobile SDKs for consumption
